

JUMBO BAG UNLOADING SYSTEM

Jumbo Bag Unloading System for powder dispensing from Jumbo Bags. Cybernetik offers range of Jumbo Bag Unloading Systems to accept 200 to 1000 kg bags. Unique docking head connects bag spout to down stream equipment for dust free transfer of powder from bag. Four heavy duty massaging arms help remove settled powder from bags without damage. System is offered in carbon steel and SS304 construction for use in Chemical, Food and Pharma application. Loss in weight feature is offered as add on and helps meter out powders for precision dosing. Additional features include optional In Line sifting, In Line lump breaker and pneumatic conveying.
